TEMPERATURE SYSTEMS

Who We Are

Cortrols Temperature Systems has been delivering imaginative and innovative service to the HVAC industry since 1980. With over 40 years' experience and thousands of projects successfully completed throughout Australia, we get to the core of optimising Building Management Systems.

By applying our expert knowledge of the industry to source, supply and service the best available solutions with a focus on HVAC and energy monitoring systems, Cortrols is your ideal choice. Based in Victoria, we are one of Australia's most reputable Building Management System providers delivering unique and reliable solutions to clients across a wide range of industries.

"Cortrols is not only focused on providing reliable and scalable products but also offers customised solutions to bring you more efficient and intelligent ways to optimise total building performance."

To ensure seamless integration with third party mechanical, electrical and hydraulic building services and equipment, Cortrols offer systems that utilise latest technologies such as:

WEB Based Solutions

Energy Tracking and Reporting Tools

Alarm Management and Handling

Modbus Protocol systems

BACnet Open Protocol systems.

Coupled with emergency call out response, routine maintenance and **comprehensive stock levels** of all key components, your solution is only a phone call away.

Where You'll Find Us

We provide cost competitive, energy efficient building control solutions in line with Australian Standards, to meet National Australian Built Environment Ratings (NABERS) and Greenstar requirements for:

Educational Institutions

Hotels

Storage Facilities

Commercial Buildings & Shopping Centres

Hospitals & Aged Care Facilities

Recreational Facilities

Residential Apartment Complexes

Agricultural & Research Facilities

What We Offer

With ever increasing energy costs, you need an innovative and integrated solution that uses latest technologies to help reduce these costs, improve efficiency, and meet sustainable goals. We understand this and take pride in delivering flexible Building Automation Systems that monitor and control the buildings' energy needs, while creating a healthy, sustainable environment.

"The installation of our systems ensures the best in energy monitoring, training and reporting"

Our Products

INNOTECH

Innotech, the largest developer and manufacturer of environmental controls in Australia, is renowned worldwide. Cortrols Temperature Systems has been the exclusive Victorian, and overall largest supplier of Innotech since 1990. Innotech deliver the finest products including Stand-alone HVAC Controls, Direct Digital Controllers and Building and Energy Management Systems and Software including the latest innovation - Omni.

omni

- Innotech protocol, native BACnet & BTL Listing
- Cross Platform web-server with real-time monitoring
- Programmable Points (UI/O) with self-diagnostics
- On-board or remote HMI
- On board data logging allowing up to 180 million records
- Email & SMS alarm notification
- Backward Compatibility with existing Innotech systems
- Expansion capabilities for enhanced flexibility and savings

"Designed by users, for users, so we know it will deliver what you need."

SIEMENS

Siemens Building Technologies is the worldwide leader in innovative and proven products for the commercial building industry.

Cortrols Temperature Systems is an authorised distribution partner for Siemens Building Technology products which includes everything you need to construct an effective and economical HVAC control system, including; valves and valve actuators, damper actuators, controllers, sensors, energy meters, gas detection, thermostats and more.

OUR COMMITMENT TO BETTER SERVICE

Cortrols boasts a dedicated Service Department comprised of highly experienced and specialist trained technicians.

- Our team members are constantly undergoing professional training and development, ensuring they are equipped with the skills and technical knowledge to deliver the highest level of service.
- All techs have police and working with children checks, making them available for work on-site wherever and whenever needed.
- Our team is trained to evaluate and rectify issues that may lead to breakdown, saving you time, money and stress.
- Our team operates in accordance with strict OH&S procedures and policies
- Our clients enjoy a committed team of professionals that deliver priority responses and continuous support along with customised solutions to suit your budget.

A Cortrols Temperature Control System means minimising interruptions and repairs, maximising your investment and enjoying professional support along the way.
